

## BOUND TO SEE IT ALL

Visitors to the Exposition Undaunted by the Untoward Weather Conditions.

## CROWD GOES IN SPITE OF THE COLD RAIN

Sunday Witnesses Such a Thrang as Gives Officials a Surprise.

## CONCERTS THE ONLY SPECIAL FEATURE

Innes and His Musicians Delight Many People at the Auditorium.

## APPARENT BALANCE FOR THE PROFIT SIDE

Money Enough on Hand to Pay All Expenses and Leave a Handsome Dividend for the Stockholders and More to Come In.

Total Admissions Yesterday 11,104  
Total to Date 2,192,396

The bright skies that remained so loyal all through the week were overcast again yesterday and the immense crowds of the preceding days gave place to a few thousand enthusiastic sightseers whom the discomforts of the day could not daunt. It was surprising that there were so many of them. Even in the morning when the steadily drizzling rain was kept by a north wind that fairly penetrated through and through the human anatomy the grounds were far from being deserted. When 1,100 people came out before 1 o'clock on such a day as yesterday and paid 50 cents to get in, when by waiting until afternoon they could have saved the half price, it is a pretty pertinent indication that the people consider the show worth coming to see. About that number must have done that very thing for the receipts at the gates at 1 o'clock were \$500. Later in the day when the clouds ceased to drizzle, the drive increased and by the middle of the afternoon there were enough people on the grounds to surprise the officials who had scarcely expected to pay expenses in the face of such conditions. The show was not at its prettiest. The buildings reflected the drizzle, the fountains and the wide promenade and compelled the crowd to move lively to keep warm. Even the still gorgeous coloring of the foliage and flowers seemed a trifle out of place in the chill atmosphere and the crowd saw fire and an easy chair more fascinating than the frigid panorama of doors.

## Crowd Enjoys the Show.

But if these exterior inconveniences were sufficient to minimize the enjoyment of those who have become familiar with the beauties of the grounds, they seemed to have no effect on the bulk of the crowd. This represented visitors who have had no such experience and who are not yet weary of the great enterprise which they had heard so much from their neighbors who had come and gone before them and they found it sufficiently interesting to compensate them for minor discomforts. The cold inspired a gregarious tendency and the people promenade over the grounds in parties of twenty and fifty instead of breaking up into small parties, as usual, and, although the task of keeping warm seemed to involve more noise and confusion than is usually noticed on the grounds on the first day of the week, it kept the people good-natured and they seemed to be having as much fun out of their visit as when the skies were clear. The evening crowd was not gratifying. Very few people came out after 3 o'clock and many of the earlier arrivals went home after a glimpse at the illuminations.

The concerts by Innes and his band were the only feature of the day in the auditorium. The atmosphere was too raw to make sitting through a long program especially enjoyable. But the crowd supplied in enthusiasm what it lacked in proportions and it took advantage of the end of every number to applaud with sufficient vigor to quicken the concertmaster. The sacred music in the afternoon included a number of selections that are comparatively new to the average auditor and these were rendered with the same magnificent spirit that characterizes nearly all the work of Mr. Innes' musicians. The opening number was Mendelssohn's overture, "The Midsummer Night's Dream," which was greeted with two encores to satisfy the crowd. The intermezzo from "Cavalleria Rusticana" won its customary ovation and the rendition of the symphonic poem, "Les Preludes," by Liszt, was another feature of notable interest. Schubert's overture, "The Forest Murders," was also well received. The concert by Mr. Kelly, and the final military march by Tschakowsky were among the remaining selections that were heard with pronounced favor.

## Prospective Balance Sheet.

As only fifteen days of the exposition remain there is already a good deal of figuring on the prospective financial status of the enterprise when the gates are closed. With fairly good weather during the remainder of the month a very satisfactory showing is assured. As nearly as can be estimated at this time the net balance that will stand in favor of the exposition will be about \$140,000 plus the receipts from now to the end of October. The bank balance, with cash in the hands of the secretary, now aggregates almost exactly \$200,000. The indications so far are that the estimate of \$100,000 for the cost of operation during October will not be far out of the way. To this must be added bills aggregating about \$5,000 still outstanding on account of the stock show, premiums amounting to \$25,000 and contract balances amounting to \$21,635. This makes a prospective expenditure to the end of the month of \$150,000. Two weekly payrolls in October, which aggregate \$10,000, have been paid and an equal amount has been paid to Innes' band. These amounts are dependent on to offset any additional expenditures that may arise and it is regarded as a conservative statement that the exposition now has \$10,000 in sight after all bills are paid to November 1. Figuring on this basis, every dollar that is taken in from now to the end may properly be added to this balance.

## Live Stock Show a Success.

George R. Mokol, vice president of the St. Joseph Live Stock Commission company, who has been in the city attending the live stock show, speaking of the animals exhibited, last night, before leaving for home, said: "There never has been any such fair as this in this country. I have attended all of the live stock shows during the last fifteen years and this is the best. There are not so many horses as there used to be some years ago, but those that are here are more beautiful. When it comes to cattle, sheep and hogs, there was never such a lot of animals brought to any show as there is here. This country has been favored for the purpose of showing

the best. There are animals here from about every state in the union, as well as some from Canada.

"The live stock show has been well attended by the farmers, who have shown a deep interest in this class of exhibits, and I am of the opinion that they will profit largely by what they have seen, as many of them have already negotiated for the purchase of animals for the purpose of improving their herds."

## FRUIT MEN KEEPING UP THE PACE.

Horticultural Building the Scene of Much Competitive Activity.  
The exhibitors in the Horticultural building are prepared to make a great show this week. All day yesterday they put in their time getting their exhibits ready for the inspection of the public and last night they had everything in the best of shape. During the day Superintendent Younger, Mr. Nebraska's fruit and put the exhibit in as good shape as it has been at any time since the opening of the exposition. They filled the tables in front of the building with apples, most of which are those of the crop of 1897. These are as sound and perfect as though they had been picked last week. On the tables in front of the building, pears, plums, apricots and numerous other varieties of fruits have been placed.

Nebraska will have its apple day next Wednesday and the work done yesterday was preliminary to this big show, when from 200 to 300 barrels of apples will be given away. The occasion is Nebraska day. ## MANY ARE STILL MISSING

Fifty-One Victims of Mohegan Wreck Recovered and Eleven Identified.

## REMARKABLE STORIES OF RESCUE TOLD

Discovery is Made that the Ship Was Far Out of Its Course and Light and Wind Were Favorable When It Struck.

LONDON, Oct. 16.—The Atlantic Transport company issued the following statement this evening regarding the fate of the passengers and crew of the Mohegan, which was wrecked last Friday evening off the coast, between the Manacles and the lowlands.

"Of the passengers, eleven have been saved, ten bodies have been recovered and thirty-three are missing.  
"Of the crew and cattleman, thirty-nine have been saved, fourteen bodies have been recovered and fifty-one are missing."  
Since this statement was issued, thirteen other bodies were picked up, including two that have been identified as those of passengers.

The reports of the various correspondents differ widely as to the rescue, recoveries and losses, though none have been able to obtain the exact number of those saved or of the bodies recovered.

The bodies of the following passengers have been recovered:

T. W. KING.  
EDNA KING.  
MASTER KING.  
JAMES BLACKY.  
MISS H. M. COWEN.  
DR. FALLIS.  
B. FRANKLIN FULLER.  
MRS. L. M. LUKE.  
GEORGE SEYMOUR.  
MISS H. WARRNER.

Up to midnight fifty-one bodies were recovered. Some were five miles away in coves and it is expected more will be washed there tomorrow. Many persons were undoubtedly killed by being dashed on the rocks who would have been saved if hurled on an ordinary shore. A great deal of jewelry and money has been found.

One appears to be German woman. She wore a watch and wedding ring, both engraved "1871." The other woman wore a silver brooch, with the letter "D" in pearls. This is probably the body of Mrs. Charles Dunton. Nine of the bodies have been brought to Falmouth. The rescued passengers are being taken care of at cottages and the crew at the Sailors' Home at Falmouth. Boats have been cruising in the vicinity all day in the hope of picking up other bodies.

## Cause of Accident a Mystery.

The cause of the disaster remains the profoundest mystery. Nobody attempts to explain how the Mohegan got so far north of its true course, from six to seven miles. There was a fog on the night of the wreck. The wind on its port quarter was not sufficient to prevent the vessel answering the helm. It has been suggested that the compass was faulty, but daylight lasted long after Edgewise light was passed.

The sailors say the fact that the Lizard light was not visible should have served to give the alarm. The masts of the Mohegan, which are above water, show that its stern is landward, accounting for the theory that he was in the bay—suddenly turned seaward. Two engineers who were saved declared, however, that they never shook heads.

Remarkable stories of rescue continue. Robert Barrow, a seaman, performed the feat of swimming unaided through the roughest water to Cove Rock Point, a distance of two and one-half miles. He climbed up the rugged cliff, where a searching party found him early the next morning completely exhausted.

A. C. L. Smith of Oregon, a passenger, surrendered his place to a woman in the water wreckage that was supporting him and swam ashore unaided. The woman was saved. Her name is Miss Mary Webb, but no such name appears in the company's list. W. W. Smith and J. Bloomingdale say there was the greatest difficulty in launching the boats. The ropes were new and stiff and the blocks would not work. Four or five times as many sailors as should have been necessary struggled to lower each boat. The lockers were hard to open. The crew, in a chivalrous effort to save the women, made the mistake of undermining the boats. There were only four sailors in one boat, which capsized as soon as it was launched. Messrs. Smith and Bloomingdale say that Captain Griffiths had appeared all day.

The death of T. W. King, who was a newspaper proprietor at Nantucket, Mass., and of his family, including Mrs. King, her mother, Mrs. Webb, and his sons, Rufus, aged 11 years, and Anthony, aged 7 years, has caused deep sorrow at Penzance, where the family had a summer cottage and were very popular.

Joseph O'Rourke, King's valet, who was saved, says he was on deck when the crash came. The light was out immediately. Rushing to the saloon, he heard Mr. King exhorting his family to keep cool. O'Rourke, with seven others, clung to the rigging until 6 o'clock yesterday morning, when a lifeboat took him off. He identified the bodies of the King's and Mrs. Welker and had them embalmed.

The description in the London dispatch of Mr. T. W. King as a newspaper proprietor at Nantucket, Mass., is probably erroneous. Inquiry shows that the proprietors of the local papers in Nantucket and its vicinity bore other names. In Boston newspaper circles Mr. King's name is unfamiliar. Probably he was a wealthy summer resident of Nantucket.

## Miss Frazier Among Lost.

TOLEDO, Oct. 16.—Miss W. Frazier, a well known Toledo attorney, has received word that his sister, Miss Mary Frazier of Marion, Ind., was aboard the ill-fated steamer Mohegan. After persistent efforts to locate her he has reason to believe she is among the lost.

## Norwegian Sloop Wrecked.

NEWCASTLE-ON-TYNE, Oct. 16.—The Norwegian sloop Fremad was driven on the rocks at Blyth, about eleven miles north of Newcastle, in a fierce sea today. Its crew was rescued after heroic work by the lifeboats, one of which capsized in the attempt.

## Double Drowning at Newark.

NEW YORK, Oct. 16.—William Louie and John Welch, both of Newark, were drowned in Newark bay this afternoon. In company with two other young men they went crabbing. Though the water was rough and they put back. While alongside the Lehigh Valley railroad bridge and endeavoring to climb upon the string pieces Welch fell into the water. Louie saved him by the shoulder but he was dragged down and both were drowned.

## To Make McKinley Doctor of Laws.

CHICAGO, Oct. 16.—The degree of LL.D. will be conferred tomorrow on President McKinley by the University of Chicago. The ceremony will be held at the university at luncheon by President and Mrs. Harper at their residence, and afterwards, accompanied by the trustees and faculty of the institution, will proceed to

## AT WORK ON CRISTOBOL COLON

Hobson Sets Plans Into Operation for Raising Vessel—Teresa to Be Sent North.

SANTIAGO, Oct. 16.—Naval Constructor Hobson, who has arrived here from the wreck of the Colon, will leave tomorrow for Guantamano on business connected with the Infanta Maria Teresa, which he expects to get off to the United States before the end of the month. For the last few days he has been engaged in preparing to raise the Cristobol Colon, a work which is practically impossible from the sea, because of the dangerously heavy swell. The operations will therefore be conducted from the shore.

Hobson has built a trolley line out to the ship, a distance of 150 feet, with a suspension bridge and the compressed air pumps are now in position. On his return from Guantamano he will push his operations vigorously, as he still feels absolutely certain of raising the hull unhurt.

In Guantamano bay there are several schooners loaded with coal for the fleet. Demurrage expenses being very heavy, the senior officer, Captain Chester, ordered sheds to be built on shore so that the vessels might unload, thus saving the bargeage. Captain Chester has raised a tremendous hubbub among the Cubans and is one reason given by the Cuban general, Perez, for not disbanding his troops.

He claims that the Americans have no right to establish a coaling station without the permission of the Cuban government. He is generally believed at Santiago among the Cubans that his promise to disband was only a scheme to obtain rations for himself and his troops, by pretending to go to work elsewhere. Now he makes several excuses for not disbanding.

## PREPARE FOR KAISER'S VISIT

Elaborate Preparations Making at Constantinople to Entertain the Imperial Guest.

(Copyright, 1898, by Press Publishing Co.)  
LONDON, Oct. 16.—(New York World Cablegram—Special Telegram.)—The Matin public Constantinople dispatch says that preparations are being made for the Kaiser's visit. Adjoining the sultan's palace a huge structure has been erected for the accommodation of the imperial party. This building has been put up in a few weeks, but it is already being occupied night and day to accomplish it. The sultan takes the deepest interest in the arrangements for the imperial guests. He has visited the new building several times daily and personally superintended the operations. The ground apartments of this building will be occupied by the Kaiser and the first floor has been reserved for the accommodation of the emperor and empress. The rooms set apart for their majesties look out on one side upon the Bosphorus, on the other upon a magnificent garden with cascades. The rooms are elegantly furnished with white and gold blue silk. The central chamber is the sleeping apartment, which runs along one side of the building to the other. In the middle stand the beds, which are so disposed that an enchanting prospect over the sea meets the eyes of the occupants.

The rooms set apart for their majesties look out on one side upon the Bosphorus, on the other upon a magnificent garden with cascades. The rooms are elegantly furnished with white and gold blue silk. The central chamber is the sleeping apartment, which runs along one side of the building to the other. In the middle stand the beds, which are so disposed that an enchanting prospect over the sea meets the eyes of the occupants.
